### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew L. Dunlap on 05/31/2011.

Claims 9 and 18 have been amended as follows:

9. The biological information monitoring system set forth in claim 22, wherein at least one of said first biological information sensor module and said second biological information sensor module includes a memory for storing a determination result of the comparison received from said measurement calculating unit.

18. The biological information monitoring system set forth in claim 26, wherein each said plurality of biological information sensor modules includes said communicator for communicating with the external electronic device to wirelessly transmit the determination result, wherein each respective communicator of said plurality of biological information sensor modules wirelessly transmits a respective identification signal for distinguishing individual living subjects each having a respective biological information sensor module of the plurality of biological information sensor modules, and the determination result, and, wherein said external electronic device analyzes each respective identification

signal and the determination result transmitted from each respective communicator, so as to identify the individual living subjects.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Claims 9, 18, 22, 24, 26, 28 and 29 are allowed.

The following is an examiner's statement of reasons for allowance: With regard to claims 9, 18, 22, 24, 26, 28 and 29 none of the prior art teaches or suggests alone or in combination a biological information monitoring system including a first and second biological information sensor modules, from a plurality of biological information sensor modules, adapted to be attached to another of the right and the left side of a subject body. Each of the biological information sensor modules including a sensor and a wireless communicator and, the first biological information module including a calculating unit. The calculating unit configured to detect an abnormality in pulseonly when the measured difference between both sensor modules is equal or greater than of 7 beats per minute..

Although U.S. Patents 5,724,980 to Nakamura et al, teaches a pulse diagnosis meter to determine an imbalance in pulse and blood pressure which utilizes two pressure cuffs connected to an external processor and a display, Nakamura does not disclose that the meter includes, in a single module a wireless communicator to transmit the biological information or a calculating unit configured to detect an abnormality only when the pulse difference is equal or grater than 7 beats per minute. Nakamura only

teaches that the processor is configured to detect a differential value and to determine whether the difference is equal or greater than a predetermined value.

Although U. S. Patent 6,344,025 to Inagaki et al, 4,669,485 to Russell, 5,862,803 to Besson, et al U.S. Patent Application 2003/0224685 to Sharma and The Journal of Nursing Science, December 31, 1990 disclose various aspects of known monitoring systems and recognized relevance of the clinical aspects of acceptable physiological parameter ranges, none of them alone or in combination teach or suggest a system with a plurality of biological information sensor modules configured to detect an abnormality in pulse only when the when the measured difference between a first and a second biological information sensor modules is equal or greater than of 7 beats per minute for pulse. , Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
